

Abstract of the Disclosure

1
2 A wrench head includes a first end having a drive portion for driving a
3 fastener. A second end of the wrench head includes a star polygonal hole that is a
4 treble square hole having twelve angled portions. Each angled portion includes
5 two sidewalls meeting at a common line. The respective sidewall of the respective
6 angled portion joins an associated sidewall of another angled portion adjacent to
7 the respective angled portion, forming a ridge.
